

DECK DECOMPRESSION CHAMBER OPERATOR

Course Overview

The course will be conducted at our Hyperbaric Unit training centre using our certified twin-lock Deck Decompression Chamber (DDC). The course aims to provide the operators / diving personnel with the appropriate training to operate all compressed air deck diving decompression chambers as well as to provide them the certification upon course completion.

Course Content

- Understanding of Decompression tables.
- Familiarisation of the DDC system and operator use
- Practical operation of the DDC including procedures & drills

Benefits

Competency development and formal training leading to certification at the end of course. With the combination of theory and practical assessment, it builds up the confidence level of personnel.

Duration

3 days (classroom preparation work & DDC practical exercises) *From 0900hrs to 1700hrs*

Who Should Attend

Divers, supervisors, ALST's, or personnel holding a recognised diving industry qualification.

Entry Requirements

All attendees must have completed a formal dive training / ALST or other recognised course and have a understanding of diving physics, physiology and basic physics calculations – *potential delegates will require to submit their CV for review and assessment for suitability for the course.*

Course Assessment and Certification

There will be a written examination and ongoing / final practical assessment. Delegates who have successfully completed and passed the examination and assessment will be awarded with KBA Training competency certificate.
